Total Grants			€ 10,846,010
Total Loans			€ 57,000,000

Project Description

Montenegro, intent on developing to its full potential, particularly when it comes to tourism, has embarked on an ambitious programme of improving its water and wastewater systems.

A National Project Implementation Unit (PROCON) was established and tasked with the implementation of public utilities and environmental projects throughout the country. PROCON's resources are however limited when compared to the volume of investments to be contracted, monitored and disbursed. To cover this gap,

since 2009 the WBIF has financed project preparation (€2.6 million) and co-financed investments (€5 million) in several municipalities across the country.

The investments will benefit approximately 200,000 people, who will have access to better water supply and wastewater facilities and who will thus be living in a safer environment. Moreover, the new investments will help the local citizens better capitalize on the tourist, agricultural and industrial potential of the region.

Results and Benefits

- significant improvement of the water, air and soil quality
 - sustainable wastewater and water supply management
 - strengthening of national capacities in the sector of wastewaters
 - training for Municipalities and Water supply and sewerage network companies on project management
 - improvement of public health
 - development of a sustainable tourism
-
- **Countries:** Montenegro
 - **Code:** PRJ-MNE-ENV-001
 - **Sector:** Environment
 - **Lead IFI:** EIB, EIB
 - **Status:** Implementation
 - **Beneficiary:** Municipalities of Montenegro
